Water Service Connection

Short Tap

A short tap shall be considered any service connection on a street to a main on the same side of the street as the building or on site.

Long Tap

A long tap shall be considered any service connection installed on a main located across the street from the building.

Long Tap Without Copper

A long tap without copper is an alternative selected by the builder and/or owner who elects to perform the boring and installation of the copper service under the street, rather than having the Water Department do so. The Water Department will make the necessary connection of the furnished copper line to the water main and to the building service line.

All service connections of two (2) inches or less shall be furnished and installed by the City of Taylor Department of Public Works, Water & Sewer Division from the water main to the property line. All service connections of more than two (2) inches shall be installed by a private contractor subject to the inspection and approval of the City. The cost of the water meter must be paid at the time the tap permit is paid.

Water and Sewer Tap Fees may be adjusted by the Director of Water and Sewer under special or unusual circumstances. Service installations may be deemed special or unusual based upon certain conditions, lot size, and/or types of structures, new or existing. Decisions will be based on factual information provided by the applicant and on site inspection of the property being serviced. The Director's decision will be final.
